Our Promise

We take time caring for all our trees ensuring they meet our very high standards. We know that when trees leave our nursery they are in the best condition possible. We believe in giving you the very best advice on how to care for your trees once they have left our nursery. This includes planting tips, how to stake your trees where applicable and how to water your trees to give them a great start in your garden.

Once trees leave our nursery however, we have no control over their welfare. If you find that you have any issue with your trees we are more than happy to discuss this with you and together work out possible solutions. Any replacement of trees will be at our discretion.
