PODOCARPUS HENKELII

South African Totara

Features

- A strikingly elegant tree with drooping foliage which emerges in spring as light pink then turning green and finally dark green in summer.
- Has a naturally pyramidal form.
- Slow growing, very long lived and ultimately a large tree.

Uses

- A tree with many appeals and uses.
- Copes well being in a container or tub.
- Very striking as a specimen tree or in a row.
- Suitable for medium and large gardens, parks and streets.

Growing Conditions

- Frost, wind and coastal hardy.
- Grows in dry to very moist soil conditions.
- Full sun to partial shade.
